MediLogic® Foot Pressure Measurement System

High-tech diagnostics for foot treatment.

MediLogic® Foot Pressure Measurement System

3D imaging of pressure peaks under the foot

Using computer-assisted MediLogic® systems for modern foot diagnostics determines a doctor's/orthotist's success in a number of ways. By using MediLogic® to measure plantar foot pressure and weight distribution the user can precisely analyze results and record the status of the human foot statically and dynamically. Data on impact stresses are indispensable for providing a high-quality foot orthosis, particularly for high-risk foot deformities such as diabetic foot syndrome or for deformities associated with rheumatic diseases, and also for athletes.

Features

- Detects areas of plantar weight bearing and pressure peaks
- Easy to use, simple measuring process, wireless transmission, and clear graphic imaging provide an overview of the measurements
- Dynamic in-shoe measurement using flexible measuring insoles (option of before and after foot orthotic treatment for comparison)
- Measurement can be done at any location, e.g. while playing a sport
- Dynamic measurement of barefoot gait or static measurement on a cutting-edge force plate (large and small versions available)

Foot orthoses – ready to wear

ErgoPad® *weightflex*

The ErgoPad weightflex orthosis combines two types of plastic material with different levels of firmness in its orthotic core. The „weightflex-X“ offers variable support according to individual foot conditions, therapeutic goals and body weight. Thanks to the integral hinges in the forefoot and heel areas, the foot orthoses can easily be worn in shoes with higher heels.

Features

- Variable support (soft, medium, strong) according to individual foot conditions, therapeutic goals and body weight
- Can be adjusted to suit different heel heights
- Available in sizes from 35 – 48 and in two widths
- Available in combination with various cushion layer, bottom and top coatings or as orthotic core only for individual modification

ErgoPad® *weightflex 2*

Based on the weightflex orthotic core, this Ready-to-wear model of the known ErgoPad® weightflex is covered with a durable cushion layer made of PU foam.

Features

- Variable support (soft, medium, strong) according to individual foot conditions, therapeutic goals and body weight
- Thanks to the integrated hinges in the forefoot and heel areas it can be worn in ballerina style shoes as well as in shoes with higher heels
- Soft PU-foam provides sufficient cushioning in the forefoot and heel area
- Needs no further modification/ customizing but can be easily adjusted to the shoe form
- Soft textile top cover, easy to clean
- Available in two widths and in sizes from 35 – 48

Foot orthoses – ready to wear

GloboTec® comfort *sports*

Comfort sports foot orthoses are perfectly adapted to various movement patterns in sports and are therefore available in three versions. *Walk* supports the foot during hiking and walking, *play*, *run* and *golf* are ideally suited for those who play sports but require preventive support and relief.

Features

- Sport-specific control of the hindfoot, support for the mid-foot and cushioning of sensitive plantar regions
- Suitable for running, ball and court sports, walking and hiking, as well as strenuous standing
- Thin, long-shaped foot orthotic
- Flexible, soft edges
- Moderate arch support
- Vertical construction of three different materials
- Patented three-dimensional connection between the different material zones
- Irritation-free transitions between the different materials
- Microfiber top cover for perfect foot hygiene
- Modifications by heat gun (thermomoldable)
- No grinding required - ready-to wear-product

Item number	Description	Stock size

professional heel

For successful and lasting therapy, Physicians recommend special foot orthoses that specifically address heel pain. The professional *heel* is designed to relieve pressure on the painful heel area. At the same time it supports the lowered foot arches that occur with flat feet.

Features

- Reduces acute pain
- Restores mobility and makes heels pain-free again
- Effective therapy that not only treats painful symptoms, but also addresses one common cause of heel complaints (flatfoot deformity)
- Prevents chronic pain
- Reduces the need for painful therapies, such as injections and operations
- Less need for pain medication, which means fewer unpleasant side effects
- Custom fit provided by Certified Orthotists / Prosthetists or Certified Pedorthists
- Makes it possible to be actively involved in everyday work and leisure activities

Item number	Description	Stock size
312400500440	professional heel, wide, upper layer separate	38–48

GloboTec® Children Insoles

The GloboTec® children foot orthoses are designed specifically for children demands. For the special problems of children's feet and its development, the GloboTec® children's range includes a variety of special designs and models. Colors and designs that appeal to children ensure the required compliance.

Features

- Selected models come with a higher heel cup
- Narrow and wide heel designs
- Soft, flexible edges
- Thin, stable, sturdy, durable, lightweight
- Variety of high-quality cover materials, some printed

Foot orthoses – Orthotic blanks

TRIactive®

The 3-zone foot orthoses for demands of athletic activities.

The TRIactive® foot orthoses concept with its three models – run, play, and walk – is vertically designed for the special needs of active people and to provide optimal, sport-specific support for the feet.

Our patented PowerWave® connection – the different density zones of the insole material are firmly interlocked – translates into cutting-edge design and optimal biomechanic functionality. The TRIactive® can be customized by a pedorthist/orthotist to the individual requirements of the foot and athletic footwear.

Bauerfeind innovation:

TRIactive® foot orthoses consistently realize the high standards of comfort and functionality that athletes demand and have become the gold standard for today's athletic foot products.

TRIactive® generates additional opportunities for:

- sales approaches with its award-winning product design
- high-quality products for various foot problems

TRIactive® run

The foot orthosis for athletes that is specifically designed for the recurring patterns of loading and movements involved in running and for the demands associated with heel-impact, midstance and propulsion phases.

TRIactive® play

The foot orthosis for athletes that is specifically developed for sports that involve quick changes of direction. Complicated sequences of movements in ball and racket sports, such as tennis, squash and basketball, stress the feet and entire body through abrupt stops, accelerations and foot torsion. TRIactive® play guides and supports the feet while also effectively cushioning areas where pressure peaks are likely.

TRIactive® walk

The foot orthosis for athletes that is specifically designed for the stresses during extended walking and standing. This insole increases foot comfort, supports the statics of the entire musculoskeletal system and improves performance.

TRIactive® golf

The foot orthosis for athletes that is specifically designed for the stresses during Golf sports. Its designed to guide and support the foot while walking on the golf course and teeing off. TRIactive® golf foot orthoses are equally suitable for left-handed and right-handed players.

Item number	Description	Stock size
324100500000	TRIactive walk	35–50
324150500000	TRIactive play	35–50
324250500000	TRIactive run	35–50
324300580000	TRIactive run, comfort shoe shape	35–50
324400500000	TRIactive golf	35–50

Milled Sport Insoles

These special sport insoles improve posture, reduce the sport-specific stresses and torques, and optimally distribute body weight, which relieves the entire musculoskeletal system. The added stability helps to prevent injuries.

Features

- 3- or 4-layer blanks (material: 25°-50° shore A)
- Constructed using cutting-edge CAD-technology
- Manufactured using CNC-milling
- Foot orthoses designed for sport-specific impacts and movements
- Easily grindable
- Easy to glue

The foot orthoses come for the following sports:

- Golf (teeing off right and left handed)
- Inline skating
- Mountain biking
- Alpine skiing
- Football/Soccer
- Tennis
- Court/Field
- Hiking/Walking
- Running

Golf (teeing off right-handed)

(right insole)

(left insole)

GloboTec® Comfort

GloboTec® Comfort foot orthoses are characterized by their excellent wearing comfort, and its wide range of designs.

Features

- Flexible but braced insole blank
- Core material thermomoldable at 110°C (230°F)
- Soft edges
- Insole core provides lasting elasticity
- Thin heel
- Short and long sole designs with/without top layer and a variety of cover materials
- Easily grindable
- Easy to glue
- Pedorthist / Orthotist has very little finishing and modification work to do
- Range from size 20 to size 48

ErgoPad® system:s

With ErgoPad® system:s – the unique soft foam foot orthosis with a modular design – the technician can build a foot orthosis that is perfectly fitted to the indication. This is because the ErgoPad® system:s offers a special base layer for five common foot deformities, which can be combined with top layer variants from the Basic, Standard and Pro categories.

Features

- Mild decreased arch / splayed foot
- Mild decreased arch
- Decreased arch and splayed foot with or without rearfoot valgus
- Decreased arch and splayed foot with/without rearfoot valgus and heel pain
- High arched foot / Pes cavus
- Five non-glued base layers, available in short and long soles
- With thermal reinforcement
- Can be combined with various cushion layers and top covers
- Only minimal processing needed
- Possibilities for individual alterations
- Range from size 35-50

ErgoPad® system:s with PowerDots

Over 80 percent of all foot deformities have an underlying hypotonic muscular tension condition – i.e. a reduced capacity of the skeletal musculature. Arch decreased and splay foot are similarly common conditions. For these symptoms Bauerfeind offers the ErgoPad system:s soft foam foot orthosis with a muscle-stimulating PowerDots cushion layer. When worn on a daily basis it improves coordination, sense of balance and muscular stability.

Features

- PowerDots elements stimulate the musculature of the sole of the foot and the continuing trunk and spinal musculature
- The light, nubbed texture also improves the sensory perception on the soles of the feet during walking
- Combination with ErgoPad system:s soft foam foot orthosis
- Suitable for normal shoes during leisure and everyday activities
- Available in sizes 35 – 48 in normal and comfort shoe shape as well as cushion layer only

ErgoPad® redux hallux

The ErgoPad redux hallux orthosis is designed to provide effective conservative treatment of hallux limitus and hallux rigidus – the restriction of movement or stiffening of the metatarsophalangeal joint. The foot orthosis provides rapid relief for the painful area.

Features

- The reinforcement element provides relief in the painful area, prevents supination of the forefoot and prevents the heel from being levered out of the shoe thanks to that fact that it is tough yet elastic enough to avoid becoming stiff.
- The foot orthosis is supplied with the reinforcement element positioned for either the left or the right foot, combined with a complementary orthosis that is reduced to accommodate the reinforcing element – and of course, it can be supplied with reinforcement on both sides if required.
- Available in sizes ranging from 35 to 48 and in two widths.

Item number	Description	Stock size
336931500000	ErgoPad redux hallux, wide, left insole reinforced	38-48
336932500000	ErgoPad redux hallux, wide, right insole reinforced	38-48

¹ not available from the warehouse | ² forefoot not glued, met pad separate

GloboTec® Patricia®

Business shoes and high heels do not usually have much room for foot orthoses. The GloboTec® Patricia® line of orthoses and its wide variety of shapes, however, provide many options for proactively combating foot problems. For an active daily life without pain.

Features

- Stable injection-molded plastic blank
- Insole core thermomoldable at 130°-150°C (260°-300°F)
- Flexible insole core for optimal fit in your shoes
- Thin heel
- Short and long sole designs with/without top layer and a variety of cover materials
- Easily grindable
- Easy to glue
- Range from size 20 to size 48

GloboTec® Soft

GloboTec® Soft foot orthoses adapt flexibly to the shoe's movements, providing very comfortable arch support. The combination of high-quality materials used for the base, top layer and cover make it possible to supply different foot orthoses for a wide variety of situations – from an accommodative orthosis for arthritic feet to an athletic orthosis.

Features

- Shock-absorbing combination of materials uses the "sandwich technique"
- Insole blank comes in different densities (25°-50° shore A, tolerance ±10%) for different weights and purposes
- Thermomoldable
- Blank comes with a range of padded top layers and covers, with/without thermoplastic hindfoot reinforcement
- Easily grindable
- Easy to glue
- Range from size 20 to size 48

Soft Diabetes

People with diabetes mellitus might suffer from diabetic foot syndrome, which is characterized primarily by the presence of sensory disorders or impaired blood supply. Feet are at risk of injuries, infections and mechanically induced ulcers on their feet.

The even distribution of body weight, padding of plantar pressure peaks and the orthopedic support supplied by the Soft Diabetes helps to reduce stresses on sensitive feet. Also useful for rheumatoid foot deformities.

Features

- Pre-mould, pre-ground, long shaped foot orthotic with midfoot reinforcement:
 - Globomoll / Globelast base layer (35°/45° Shore A, thermomoldable thickness 3 mm)
 - laminated cushion layer (Poron, Globofom, Globofit, thickness 7,5 mm)
- Integrated reinforcement element increases wearing comfort, stability and safety
- Sandwich-layer construction ensures even distribution of body weight and pressure
- Also as not glued version available (cushion layer and base layer separate)

Item number	Description	Stock size
323800500000	Soft Diabetes	35-48
323800500440	Soft Diabetes, upper layer separate	35-48

ErgoMove

ErgoMove shoes are part of a complete concept that is supplemented by individual orthopedic orthoses and special stockings. This perfectly co-ordinated concept optimally fulfills the demands of sensitive feet. ErgoMove shoes combine uncompromising functional properties and timeless design.

Features

- Suitable for everyday and leisure use by people with foot problems (e.g. rheumatoid foot deformities or diabetic foot syndrome (risk classes 0 and 2))
- Comfortable and chic
- Easily adjusted for additional orthopedic shoe inserts
- Generously sized, seam-free linings (durable textile) and removable prefabricated insole
- Seam-free lining with cushioning
- Fully cushioned tongue, Cushioned upper edges
- Uppers made of premium-quality, supple calfskin
- No edges round the toe cap
- lightweight PU sole
- Molded, extended heel counter
- For women: 9 different models (low shoe, boot), with lace or Velcro closure, starting at size 36 to size 42
- For men: 7 different models (low shoe, boot), with lace or Velcro closure, starting at size 40 to size 48

GloboConcept®

GloboConcept® is a family of products that offer individuals with foot problems (e.g., arthritis, diabetes, tendency toward swelling) both preventative and therapeutic solutions in the fields of shoes, stockings, and foot orthoses.

Features

- Physiological heel height
 - Lightweight, non-skid PU-sole
 - Specially shaped heelcounter securely holds the hindfoot
 - Flexible toe cap protects the toes
 - Plenty of room for the forefoot and toe area
 - High-quality, supple calfskin upper
 - Soft, breathable, antibacterial softly padded lining
 - Can be used with individual foot orthoses thanks to the replaceable footbed
 - Padded tongue takes pressure off the upper aspect of the foot
 - Available as sandals and slippers
- Women: size 36–43
Men: size 39–47

Silversoft™

diabetic stockings for sensitive feet

These stockings are guaranteed to be a pleasure to wear and offer a snug fit without leaving pressure marks, thanks to:

- The anatomically shaped and grafted toe section
- The micro-plush fabric in the heel, sole and toe area
- The soft band around the top
- Flexible toe cap protects the toes
- Available colours: light grey, grey, black
- Material: 98% cotton, 2% Lycra
